

Declaration of citizenship of one of the EU27 Member states

for the domain(s) :eu

On 1st February 2020, the United Kingdom left the European Union (Union). The Withdrawal Agreement provides for a transition period until 31 December 2020. During the transition period, undertakings and organisations established in the United Kingdom and United Kingdom residents and citizens will continue to be able to hold and register a .eu domain name.

Based on your current registration data, on 1 January 2021, your .eu domain name(s) will no longer comply with the .eu regulatory framework.

However, you will have the opportunity to demonstrate continued compliance by updating your contact data before 1 January 2021, 00:00:00 CET by:

- **updating your citizenship to one of the EU27 Member States.**

If you would like us to proceed with updating your contact data to indicate that you are eligible to retain your .eu domain name on the basis that you are a citizen of one of the EU27 Member states, we will need you to complete and sign the declaration below.

As of 1 January 2021, 00:00:00 CET, if you have not demonstrated your eligibility within the .eu regulatory framework, your domain name(s) will be moved to the “withdrawn” status. A domain name in such status no longer functions and can no longer support any active service (such as websites or email), but its record will remain in the .eu registry database and may be reactivated if the eligibility criteria is satisfied. Twelve months later the domain names in the “withdrawn” status will be revoked.

Please be advised that this declaration will be taken in good faith and we are not required by EURid to request evidence.

EURid has implemented a set of measures in agreement with the European Commission in order to protect our customers and end-users from possible abuse. As a result, thereof, EURid may send you an email requesting that you (i) verify your registration data and (ii) confirm that you have registered your .eu domain name(s) in good faith. Failure to respond to EURid may result in the withdrawal of your domain name(s) and any active services associated will no longer be supported.

I HEREBY DECLARE

Namesco Limited to process on my behalf the operation to update the domain names and apply the citizenship specified below and also declares the following:

* the information to be accurate

* I have been informed that failure to provide evidence to EURid on request may result in the withdrawal of the domain name(s) specified above
